Ayesha, Iman, Sana	2.0	12-09-2025	Changes Based on Feedback From Faculty	
Ayesha, Iman, Sana	2.0	19-09-2005	Added Project Plan. Changes Based on Feedback From Supervisor	

Project Proposal

Project Title: AutoFYP

Opportunity & Stakeholders:

Opportunity

Final Year Project (FYP) is a mandatory part of every student's degree. In Riphah international university, the process is still managed manually, which often results in delays, errors, unfair evaluation, and weak project monitoring. This situation presents a significant opportunity to introduce an automated FYP management system. Such a system would ensure smooth, transparent, and fair handling of the entire process.

Stakeholders and Roles

- **Students:** Propose, execute, and complete their FYPs.
- **Faculty:** Guide students, manage progress, and evaluate projects.
- **Project Coordinators:** Manage the overall process, deadlines, and resources.
- **Admins:** Oversee the system, ensure data security, and control access.

Existing System/ Description of the Current Situation:

At present, there is no universal automated Final Year Project (FYP) management system available to the public that suits all colleges. Most colleges either develop their own internal, private systems accessible solely on their campuses or depend on manual methods. Numerous organizations employ spreadsheet tracking, email communication, and face-to-face meetings to oversee the FYP process, often leading to ineffective management, delays, and insufficient transparency. It creates unnecessary complexity for students to submit proposals, progress reports, and final deliverables individually to different stakeholders. The absence of a centralized system hinders supervisors from organizing meetings, monitoring progress, and providing timely feedback. Some colleges may have custom-built portals, but they lack standardization, adhere to specific requirements, and are not accessible to outside users. As a result, there isn't one platform that offers a comprehensive, automated, and collaborative FYP management solution

usable across multiple universities and ensures consistency and efficiency throughout the process

Problem Statement:

The current FYP (Final Year Project) management process is largely manual and fragmented in Riphah international universities. This traditional approach creates several challenges, including

- Frequent miscommunication between students, supervisors, and coordinators.
- Uneven supervisor workload, leading to imbalance in project guidance.
- Delays in feedback, which slow down student progress.
- Inefficient deadline management, making it difficult to track milestones.
- Reduced academic quality and productivity, due to lack of transparency and monitoring.

These issues highlight the need for a structured, automated system that can streamline FYP management and ensure fairness, efficiency, and accountability.

Proposed Solution:

The suggested system is an automated platform for FYP management that consolidates all tasks related to projects into a single user-friendly solution. It tackles the shortcomings of the manual procedure and offers an organized, clear, and effective workflow for all parties involved

Key features include:

- **Centralized Management:** Automates all FYP tasks on a single platform, simplifying project management for both students and supervisors.
- **Student Support Tools:** Checklists and feedback mechanisms to guide students, clarify next steps, and keep them on track.
- **Automated Scheduling:** Deadline reminders and meeting scheduling to keep teams organized and ensure timely completion of tasks.
- **Transparency & Fairness:** Provides equal opportunities for students and balanced workloads for supervisors.
- **Efficiency & Monitoring:** Enables coordinators and administrators to monitor progress, allocate resources, and maintain data security.

This solution creates a seamless, transparent, and fair FYP management process, improving the overall academic experience for both students and faculty.

Scope of the Project:

The Automated FYP Management System is designed to automate the entire Final Year Project process.

It offers different access levels for students, supervisors, coordinators, and administrators, so each user can do their job smoothly. The system helps reduce manual work, increases teamwork, and ensures projects move forward on time through automated features.

1. Student Module

This part allows students to sign up on the system and either start a new project group or join an existing one.

Students can submit their project plans, upload updates, and track their deadlines with automatic reminders. They get real-time updates on approvals, evaluations, and meetings.

2. Supervisor Module

The supervisor module lets supervisors check and approve or reject project proposals.

They can keep an eye on the performance of their assigned groups and check how well milestones are met. Supervisors can offer feedback and guidance using automated forms and tools.

3. Coordinator Module

This module handles the overall management of the FYP process.

Coordinators are in charge of approving project topics, making sure they are unique, and managing deadlines so all groups follow the timeline. They can also allocate supervisors to groups through automated tools, which helps distribute work fairly among faculty.

4. Admin Module

The admin module ensures the system runs smoothly and is well-managed.

Admins manage user accounts, assign roles, and control access to the system.

5. Evaluation and Reporting Module

This module supports evaluating projects at various stages.

Supervisors and coordinators can enter grades, give feedback, and track student performance using automated forms. The system automatically creates reports and summary sheets, so there's less manual work involved. It also maintains a digital record of completed projects, which can be used by future students and faculty for reference.

6. Communication and Notification Module

The communication module helps keep all stakeholders in the loop by providing real-time updates and alerts.

It sends automatic reminders to students and supervisors about deadlines, meetings, and submissions. Coordinators and admins also get regular updates on project activities. This ensures everyone stays connected and the information flows smoothly throughout the project.

List of Faculty Proposed Changes

Project Title

Supervisor's Signature: _____

Proposed Change	Proposed By	Supervisor's Decision
Add a section specifying limitations and future work of the project	Faculty	Optional – will be considered later
Add advanced search filters for FYP archives to make it easier for newcomers to find completed projects	Faculty	Optional – will be considered later

Project Plan

Roles & Responsibility Matrix:

The purpose of roles & responsibility matrix is to identify who will do what.

WBS #	WBS Deliverable	Activity #	Activity to Complete the Deliverable	Duration (# of Days)	Responsible Team Member(s) & Role(s)
1.1	Project Management	1.1.1	Prepare complete Work Breakdown Structure (WBS)	2	Iman
1.2	Roles & Responsibility Matrix	1.2.1	Create and finalize team responsibility matrix	2	Sana
1.3	Change Control System	1.3.1	Define change approval & tracking process	2	Ayesha

Roles & Responsibility Matrix:

WBS #	WBS Deliverable	Activity #	Activity to Complete the Deliverable	Duration (# of Days)	Responsible Team Member(s) & Role(s)
2.1	Final Documentation Introduction	2.1.1	Write project overview & objectives	10	Iman
2.2	Literature / Market Survey	2.2.1	Conduct research & gather references	10	Sana
2.3	Requirements Analysis	2.3.1	Collect and document requirements	10	Ayesha
2.4	System Design	2.4.1	Design architecture & flow diagrams	30	Iman
2.5	Implementation	2.5.1	Document implementation details	15	Sana
2.6	Testing & Performance Evaluation	2.6.1	Prepare test cases & evaluation report	30	Ayesha
2.7	Conclusion & Outlook	2.7.1	Summarize results & future scope	10	Iman
2.8	End User Documentation	2.8.1	Prepare user guide/manual	8	Sana

2.9	Application Administration Documentation	2.9.1	Prepare admin usage guide	8	Ayesha
2.10	System Administrator Documentation	2.10.1	Prepare system setup/config guide	8	Iman

System:

WBS #	WBS Deliverable	Activity #	Activity to Complete the Deliverable	Duration (# of Days)	Responsible Team Member(s) & Role(s)
3.1	Development Environment				
3.1.1	IDE	3.1.1.1	Install & configure IDE	2	Iman
3.1.2	Version Control	3.1.2.1	Setup GitHub repository	2	Sana
3.1.3	Server	3.1.3.1	Setup server environment	2	Ayesha
3.1.4	Database	3.1.4.1	Setup and configure database	2	Iman
3.2	Presentation Layer (Frontend)				

3.2.1	Deliverable 1	3.2.1.1	Create landing page UI	4	Iman & Sana
3.2.2	Deliverable 2	3.2.2.1	Develop user registration/login UI	15	Sana & Ayesha
3.2.3	Deliverable 3	3.2.3.1	Develop dashboard & reports UI	15	Iman & Ayesha
3.3.3	Deliverable 3	3.3.3.1	Integrate notifications & email service	20	Iman & Ayesha
3.4	Data Management Layer				
3.4.1	Deliverable 1	3.4.1.1	Design database schema	40	Iman
3.4.2	Deliverable 2	3.4.2.1	Implement CRUD operations	40	Sana
3.4.3	Deliverable 3	3.4.3.1	Optimize queries & indexing	30	Ayesha
3.5	Physical Layer				
3.5.1	Deliverable 1	3.5.1.1	Deploy system on server	30	Iman
3.5.2	Deliverable 2	3.5.2.1	Setup backup and recovery plan	10	Sana
3.5.3	Deliverable 3	3.5.3.1	Configure security & access control	10	Ayesha
